OBJECTIVE

A full-stack web engineer with vast array of knowledge in various front end and backend languages, responsive frameworks, databases and code practices. Definitely not a jack of all trades, but an expert in diverse areas that interconnects across the IT industry, with the motive of becoming an integral professional. She possesses a strong talent for learning and exploring new technologies and best practices, devising solutions and solving problems without sacrificing code and product quality. Miracle however is a core JavaScript/Nodejs and Web Engineer(Reactjs). She has played a major role in some web project that demands strong use of CSS, JavaScript, Nodejs, React js and a lot others. While a student at National open university, studying computer science and other programming languages along with data structure and algorithm and I believe that my understanding of problem solving and complex algorithms are also skills that have and will continue to contribute to any overall success as a frontend engineer.
